

ABSTRACT OF THE DISCLOSURE

An all terrain vehicle ("ATV") with a frame and at least three wheels suspended from the frame is disclosed. At least one of the wheels is a front wheel and at least one of wheels is a rear wheel. The front wheel defines a front axis and the rear wheel defines a rear axis. The front axis and the rear axis define a wheelbase of 52 to 72 inches. The ATV has a power unit mounted on the frame for driving at least one of the wheels. A straddle-type seat supported by the frame includes a main seat portion for a driver and a secondary seat portion, rearward of the main portion, for a passenger. The ATV also has a steering member connected to the frame for steering at least one of the wheels, and at least one passenger grab handle.
